## **Experiences Related to Circulation**

*This information was reported to Monroe Products and The Monroe Institute by individuals and/or by professional practitioners about the use of Hemi-Sync® in the late 1990s.*

For five years I suffered with edema in my left foot, which failed to respond to treatment. When I first started using the *HUMAN PLUS* (H+) Program *Circulation* tape, the swelling reduced almost immediately and now, after frequent use over the past three years, it seldom swells at all.

\*\*\*

H+ *Circulation* relieved a lifetime problem of unnaturally cold hands and feet, which meant that I had to sleep under a heavy weight of blankets. Within two months of using the tape this condition ceased to trouble me.

\*\*\*

A patient whose hands always felt cold due to poor circulation used the H+ *Circulation* tape. A bioExperiences machine indicated a very quick raise in temperature at a fingertip sensor from 32 to 37 degrees centigrade.

\*\*\*

Because of poor circulation, I always felt colder than anybody else, and was especially bothered by icy hands and feet. *Resonant Tuning* gives me an increase in heat throughout my body, as well as a tremendous rush of energy.
